

Special vegetable fertilizers for ground and greenhouse crops

FlorActiv Plus

Guaranteed content: Fe EDTA - 7.08% | Mn EDTA - 3.6% | Zn EDTA - 0.84%
Cu EDTA - 0.28% | Co EDTA - 0.024% | B - 1.68% | Mo - 0.24%

Characteristics and principle of action:

FlorActiv Plus is a special amino acids-based fertilizer, providing the plants with specially selected set of micronutrients in a chelated form. An innovative technology of amino acid micronutrient fertilizer manufacturing with specially selected ingredient ratio has allowed to obtain compounds that are perfectly absorbed and effective during periods of limited nutrient uptake.

- Prevents or eliminates deficiencies of various micronutrients
- Increases resistance to stress factors
- Improves plant health
- Increases the efficiency of photosynthesis due to its high iron content
- Fertilizer enriched with cobalt that limits aging processes and enhances the synthesis of vitamin B12

Nutrient % (m/m)							
Product	Fe	Mn	Zn	Cu	Co	B	Mo
	Water-soluble Iron, chelated by EDTA	Water-soluble Manganese, chelated by EDTA	Water-soluble Zinc, chelated by EDTA	Copper Water-soluble Copper, chelated by EDTA	Soluble Cobalt, chelated by EDTA	Water-soluble Boron	Water-soluble Molybdenum
FlorActiv Plus	7.08%	3.60%	0.84%	0.28%	0.024%	1.68%	0.24%

FlorActiv Plus

Crops	Treatment period	Dose [l/ha]	Working solution volume [l]
Tomato, pepper, cucumber, pumpkin, cabbage (white, red, savoy) Chinese cabbage, Brussels sprout, Cauliflower, broccoli	From planting to harvest	0.2-0.3	400-600
Carrots, parsley	From germination to the end of harvest	0.2-0.3	400-600
Beetroot	From germination to the end of harvest	0.2-0.3	400-600
Celery	From planting to harvest	0.2-0.3	400-600
Onion	From germination to the end of harvest	0.2-0.3	400-600
Beans and Peas	From germination to the end of harvest	0.2-0.3	400-600
Lettuce	From germination to the end of harvest	0.2-0.3	400-600

Application Instructions

FlorActiv Plus is the highest quality micronutrient fertilizer for ground and greenhouse crops, organic crops, and field crops, in the form of a liquid nutrient solution applied via irrigation systems or sprayers.

In order to achieve best results, we recommend using **FlorActiv Plus** as an aqueous solution with suitable foliar fertilizers, such as:

Actipol -micronutrient chelates: iron, manganese, zinc, copper, molybdenum

L-Actipol -liquid fertilizer with micronutrient chelates: iron, manganese, zinc, copper, molybdenum

ActiBor -liquid fertilizer with boron

Super ActiBor - crystalline fertilizer with boron

FoliarActiv - crystalline nitrogen-phosphorous- potassium fertilizer with chelated micronutrients

ActiCal - liquid calcium chelate

Activ ProAmin Vegetables -liquid fertilizer for vegetables

Activ ProWigor Vegetables – suspension fertilizer for vegetables

AminoMag Activ -fertilizer with high content of easily assimilable magnesium and sulphur with amino acids
